

# FLYBALL

## WHAT IS FLYBALL?

Flyball is the only true team sport offered by KUSA. Flyball sees teams of 4-6 dogs compete in a relay-type event involving jumps and fetching balls. It is fast. It is fun. It is noisy and high adrenaline.

## Reasons why you should consider Flyball

- Dogs absolutely love it.
- Great sense of sportsmanship and trust within your team.
  - You build a strong relationship with your dog.
- It's probably the most fun you can have with your dog!

# FLYBALL

## How it works...

Flyball is essentially a spectator sport.

The lanes consist of four jumps and a 'box' at the end. Each dog must run over the four hurdles, collect a ball from the box and return over the jumps. As each dog goes through the start/finish poles, the next dog may commence its run. Teams compete in a round robin format with two teams racing against each other until each team has run against all the other teams. A race is won by the team who is first to have all four dogs complete their run. Speed is important but so is accuracy. Safety is paramount.

**You can start training at any stage but generally the sooner the better.**

**No previous experience is required but it is recommended that you attend socialising and/or puppy classes.**

**It is essential that dogs have a good recall and are well socialised. Dogs must be physically fit and able to run at high speeds.**

**Find a team, start training, register your dog, become a member of KUSA, get a Record Card and start competing.**

**Dogs need to be at least 14-months old to compete.**

**For pedigreed & crossbreed dogs**
