TESTS ON OFFER

A.1.1.1 SA-VJP (YOUTH HUNTING TEST)

Is for Pointing Breeds from six months and not exceeding 18 months of age, dating from and inclusive of the date of its birth on the first day of the test. It is a young dog's natural ability test.

A.1.1.2 SA-HZP (ADVANCED HUNTING TEST)/SA-OZP (OLDER DOG HUNTING TEST)

The priority of the SA-HZP is the determination of the development of the natural abilities of the young dog in view of its suitability and future use as a Versatile Gundog. This test is for Pointing Breeds under 2 years of age without restriction as to previous performance.

The SA-HZP was developed to evaluate the natural abilities of a

young dog, particularly to identify the best dogs for breeding and assess the breeding quality of their parents. For this reason, the test is open to dogs up to the age of two years.

If dogs, due to unforeseen circumstances, can't be tested before turning two years, they are allowed to run the test up to a maximum age of 6 years. In that case, the test will be named SA-OZP (Older Dog Hunting test).

Although older dogs can be tested for the sake of breeding excellence and comparability, every effort should be made to test young dogs before they turn two years old.
