**A STEP AHEAD
FOR THEIR
BEST LIFE**

DIFFERENCES YOU CAN SEE FEEL & TRUST

Science is at the heart of our food

We believe that great nutrition can transform the lives of pets and their parents. Hill's long-term investment in learning, technology and talented scientists for more than 75 years has helped us develop ground breaking industry leading product innovations, including the most extensive range of clinical nutrition for sick, at-risk and healthy pets. We aim to change the lives of millions of pet families every day.

Experts in pet nutrition since 1939

Hill's employs over 220 veterinarians, Ph.D Nutritionists and food scientists that work passionately to ensure our food is precisely balanced - because too much of a specific nutrient can often be as harmful as too little.

Long-term feeding of a poor quality, unbalanced diet can lead to problems such as a dull coat, poor digestion, urinary conditions, kidney disease, skeletal problems, constipation, diarrhoea, weight loss or obesity and other health problems.

High quality raw ingredients

Hill's is made using the finest natural ingredients that are sourced from countries with high quality standards such as Europe, USA and New Zealand. Our products are formulated to contain:

- no artificial flavourings, colours or preservatives
- animal products derived from animals that are fit for human consumption

Our technologies

Consistent with Evidence-Based Medicine used by human physicians, Hill's performs randomized, blinded and controlled clinical feeding studies in real patients in the real world. In some cases, we've taken steps that not even human medicine has been able to. We are the only pet food company that we know of using specific nutrients to change how genes are expressed to help manage disease conditions.

Scientifically formulated

Because our products are scientifically proven, we don't simply substitute ingredients and vary formulas to allow for the use of cheaper materials as some companies do. This way, you're assured that our products are always effective and of the highest quality.

Recommended by vets worldwide

Our foods have been trusted by millions of pet owners since 1939, and today, countless veterinarians recommend and feed their own pets Hill's products more than any other brand of pet food.

Feeding Your Dog

It is important to ensure your dog gets the best nutrition at all stages of his life as a good quality, properly balanced food will help him enjoy a healthy, happy and long life. Hill's has a full range of pet foods designed to meet your dog's specific needs.

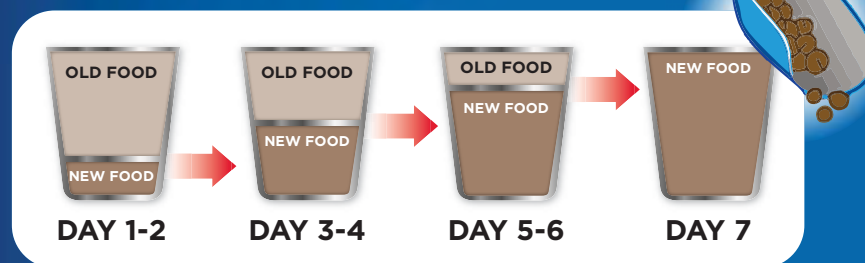

Hill's Science Plan delivers **cutting-edge food science with the power to enhance your dog's life:**

- Clinically proven antioxidants, such as vitamins C & E, to **build strong immunity**
- The right balance of vitamins and minerals for **healthy bone and joint development**
- Optimal levels of high quality protein, to support your dog's **ideal body weight**
- High quality and easy-to-digest ingredients to help **absorb more nutrients from the food**

How to introduce the new food

We recommend introducing any new food over a period of a few days to help avoid tummy upsets and for better acceptance.

TRANSITION SCHEDULE

Most pets don't like sudden change and are more willing to accept new things if change is gradual and they're allowed to make choices. For finicky and older pets or pets with health conditions, extend the transition period up to four or more weeks.

Watch his weight

To help keep your dog healthy, we recommend that you:

- weigh him regularly and ask your vet to do a body condition score
- monitor his physical condition throughout his life
- adjust the quantity of his meals accordingly
- maintain a stable feeding regime, because dogs are comfortable with regular routine

Every bag of Hill's includes a feeding guide showing a daily feeding range based on a dog's weight. Use this as a starting point and then adapt the amount based on your dog's condition.

As a guide, if your dog is at his ideal weight you should be able to feel his ribs easily and he should look sleek with no sagging around the stomach. If you are concerned about his weight, consult your vet for nutritional advice, because maintaining your dog's ideal weight not only reduces certain health risks but will also help him lead a more energetic, longer and healthier life.

And remember, treating your dog with the occasional treat and tidbit is fine, as long as it's just that ... occasional. Too many treats can lead to fast weight gain and nutritional imbalance.

Top up his water

It's important to ensure your dog has easy access to a freshly topped-up bowl of water. In fact, not having water to drink for a sustained length of time will harm his health. In hot weather, it's a great idea to add a couple of ice cubes to his water bowl to help him keep cool.

Food, shelter and love

Hill's supports many charities and shelters, including donations of food and helping pets find a new home. We help save nearly 1 million pets each year worldwide.
